## SWALWELL MUSIC PLEASES LARGE CROWD, ELKS' DANCE

ARRANGEMENTS BEING MADE TO HOLD BIG MASQUERADE IN THE HALL ON FRIDAY NIGHT, OCTOBER 25TH. MRS. TRINOR'S ORCHESTRA ENGAGED TO FURNISH THE MUSIC.

A very successful dance was held in the Elk's Hall here last Friday evening under the auspices of the Carbon B.P.O. Elks and a most enjoyable time was had by those present. The hall was crowded to capacity and we understand that nearly \$100 was cleared that night. Exceptionally fine music was furnished by the Swalwell 5-piece orchestra and it is to be hoped that it won't be long until this same music again favors Carbon with their presence. Refreshments were served at midnight and dancing continued until about 2:30 before the revellers began to weary and leave for home.

As this dance, the first of the season, was such a success, it will not be the last and arrangements have already been made to hold a masquerade ball in the Elk's Hall on Friday, October 25th, so now is the time to begin to prepare a costume. There will be seven prizes given that evening as follows: Best Dressed Lady, first and second; Best Dressed Gent, first and second; Best Comic Lady; Best Comic Gent and a prize for the most original costume on the floor.

Mrs. Trainor's four-piece orchestra of Calgary has been engaged for the occasion and arrangements are being made to have the hall appropriately decorated for the occasion.

### ARMY OF MOTORISTS HOT ON TRAIA OF CONSTRUCTION CREWS

Right in the wake of the road builders, the motor tourist, settler and sight-seer now take full advantage of the opportunity to see as much of this province as possible during the driving season. Road hazards are challenged, while bad weather has no disheartening effect on these motorists whose aim is to penetrate as far as possible into new areas in this fair

### LOBSTER CANNERY WASTE NOW SOURCE OF MEAL FOR STOCK

Lobster meal has been added to the menu of foxes in a number of Maritime fox ranches. A New Brunswick lobster canning factory which recently began the manufacture of meal from lobster bodies and shells reports that it has found a market for the new product with the fox raisers who are quoted as describing the meal as excellent for feeding purposes. Fish meal of other kinds has already been proven of great value in stock and poultry feeding. Successful employment of lobster bodies in the manufacture of meal will mean the utilization in profitable by-product operations of material which hitherto has been only waste of the lobster canning industry.

province.

During this season, traffic on the new highways being built into the Peace River district and to Jasper national park demonstrated the faith of motorists in efficient road building in Alberta. On the Peace highway, as many as 50 cars a day have passed through some points, showing the volume of traffic. This highway is not yet on the tourist route by and means, and motorists are not being encouraged to drive over it until the new grade becomes settled.

The same story of pioneer automobile comes from those living along the Jasper highway, between Edmonton and that popular tourist resort. As many as 15 and 20 cars a day have been seen on this road, though it is not yet in a finished stage.

The growing traffic on unfinished roads in the province is still another clarion call to the provincial government to expediate its highway building program, which has long been urged by the Alberta Motor Association.

## LITTLE ITEMS OF LOCAL INTEREST

I. Guttman was a Calgary visitor last week and returned on Monday.

Mr. and Mrs. J. W. Styles and Mrs. D. McGillis and children of Alsask, were visiting this week with Mr. and Mrs. C. Moorhouse.

Mrs. Geo. Munro and daughter Margaret, left for their home in Vulcan last Wednesday after spending a few days visiting with Mr. and Mrs. A. Hay.

Miss Annabelle Ramsay spent the week end at her home here.

Mrs. H. Morrison and son arrived Saturday from Oyen and are visiting with Mrs. Morrison's parents, Mr. and Mrs. J. E. James.

Miss Connie Neville of Drumheller, was a Carbon visitor last Sunday.

Mr. and Mrs. Stewart Hay left on Saturday to spend a few days at Red Deer.

The basement for Sam Parkins new house has been completed and active building operations have been commenced.

The Gamble Ladies Aid are holding their Annual Fowl Supper in the Gamble school on October 18th.

L. Poxon and Rev. W. McNichol left Monday morning for Sylvan lake on a goose hunting expedition. We wish them luck.

R. B. Wilkinson was a Carbon visitor last Sunday.

H. A. English, Mr. Livingstone and Paul Wells motored to Olds on Tuesday to attend the wedding of Gordon Livingstone at Olds on Wednesday afternoon.

Otto Foss was taken to Calgary on Tuesday, suffering from an attack of appendicitis.

Mr. and Mrs. Chas. Tighe of Vancouver arrived on Tuesday and are visiting with Mr. and Mrs. H. N. Elliott.

Born to Mr. and Mrs. W. Foster, on Saturday, October 5th, a daughter.

Mrs. W. Bramley and family returned from England last Tuesday and have again taken up residence in Carbon.

Percy Edwards received word on Monday that his brother-in-law, Mr. Stephenson, of Hanna had died that day and on Tuesday Mr. and Mrs. Edwards motored to Hanna.

We understand that Miss Marie English and W. Herron were married in Calgary yesterday morning. Mrs. English and family attended the wedding.

The Anglican church will hold a chicken supper in the Farmers' Exchange hall on Tuesday evening, October 22nd. Bishop Sherman will be out from Calgary that day.

J. M. McArthur, District Superintendent of the Canadian Pacific Railways at Medicine Hat, paid the editor a visit last Thursday.

## CURLING CLUB MUST RUN SKATING RINK IN CARBON

VILLAGE TO LEVEL SKATING RINK AND DIG WELL TO SUPPLY WATER FOR MAKING ICE; WELL PRACTICALLY COMPLETED

### MR. AND MRS. WILLIAM WATKINS CELEBRATE SILVER WEDDING ON OCTOBER 3rd

On Thursday, October 3, Mr. and Mrs. William Watkins entertained a large party of friends on the occasion of their silver wedding. The proceedings opened with a whist drive. Mrs. Edmundson won the ladies first prize and Mrs. Cooper the consolation. Mr. George Isaac won the men's first prize and Mr. Clyde White the consolation. The whist being over, a most dainty and delicious supper was served to all the guests, during which Mrs. Watkins cut and passed around the wedding cake. After supper Mr. R. Thorburn, on behalf of the assembled company, presented Mrs. Watkins with a case of silver. Mrs. Watkins, who looked charming in blue crepe de chene, expressed her thanks in a few well chosen words. Kisses and congratulations to bride and groom were then in order, followed by the singing of "He's a Jolly Good Fellow, and she's a Jolly Good Lady." The proceedings closed with a jolly dance.

Miss Martin has taken a position in C. H. Nash's store.

### A.M.A. CAMPAIGN FOR MORE HIGHWAYS IS SHOWING GOOD RESULTS THIS YEAR

The campaign being carried on by the Alberta Motor Association for better highways and more highways in this province is proving full of justification, if one but looks at what is being done both on the eastern and western sides.

In British Columbia, announcement was recently made of a project to build a motor highway from a point near Vanderhoof, west of Prince George, for 85 miles in the northerly direction to Manson Creek. Ultimately this road will extend to Finlay Forks, while another extension planned is as far north as Fort Graham.

This new highway in northern British Columbia will not be completed all the way to Manson Creek this year but a great deal of it will be done. Engineers are already on the ground and preliminary work is under way. This road will pass through a highly mineralized country as well as one of scenic beauty, providing a route that will in later years draw many tourists. It again proves the necessity of Alberta linking up with all possible speed with British Columbia in the building of automobile roads. The highway to Peace River would form the Alberta link with this new road for the coast province.

In the south it is reported that an agreement has been reached between Hon. Chas. Stewart, Minister of Interior, and Premier Tolmie, of British Columbia, under which the highway between Golden and Revelstoke will be completed. Hon. Mr. Stewart stated recently that while this would mean a route 90 miles longer than the originally projected one, it would be free of the dangers of snow slides. As the road will run around certain lakes in the vicinity, some heavy construction costs cannot be avoided.

With this road built, there will be an additional link between Alberta and British Columbia, while a big step will have been made in having a national highway across the dominion.

Saskatchewan is also going ahead this year with a heavy roads program, which will mean that links with Alberta will be established from the east. It all goes to prove that with road builders active on the eastern and western fronts, Alberta should operate and maintain an extensive highway system which should be enlarged from year to year.

BUY AT HOME

At the regular monthly meeting of the Village Council, held in the secretary's office on Monday night, the usual routine business was transacted. W. A. Braisher, as a committee of one from the Carbon Board of Trade, approached the council on the matter of running the skating rink this year as the Curling Club found that it was about all they could do to finance their own operations, and after some discussion the agreement was produced which had been drawn up between the Village of Carbon and the Curling Club when the rink was first constructed, which read that for the use of the ground, the Curling Club must build and operate a skating rink until such time as the building was paid for and the title to the building handed over to the Village. However, the Village Council were aware of the difficulty that the Curling Club had to contend with and they decided to have the skating rink levelled off and also to have a well dug near the rink to supply the water for making ice. For the benefit of our readers we might state that the well has been commenced and we understand that water has been struck at a depth of about 20 feet.

Work on the levelling of the rink will commence immediately, we are told, and as soon as the cold weather sets in everything will be in shape to make ice on both the Curling and skating rinks.

### E. J. GARLAND TO COMMENCE MEETINGS ON OCTOBER 21ST.

The Bow River U.F.A. Constituency Association have arranged the following meetings at the various towns for Mr. E.J. Garland, M.P., Harvey Hansen, U.F.A. Director for Bow River, and H. W. Leonard, Secretary for the Bow River U.F.A. Constituency Association.

List of meetings beginning October 21st, 1929:

Rockyford, Monday, Oct. 21, evening.  
Wintering Hills, Tues., Oct. 22, aftn.  
Rosebud, Tuesday, Oct. 22, Evening.  
Hesketh, Wednesday, Oct. 23, afternoon.  
Swalwell, Wednesday, Oct. 23, evening.  
Acme, Thursday, Oct. 24, Evening.  
Ideluna, Friday, Oct. 25, Evening.  
Zeoma, Saturday, Oct. 26, evening.  
Dalroy, Monday, Oct. 28, afternoon.  
Langdon, Monday, Oct. 28, evening.  
Namaka, Tuesday, Oct. 29, afternoon.  
Stanthmore, Tuesday, Oct. 29, evening.  
Chuny, Wednesday, Oct. 30, Afternoon.  
Gem, Wednesday, Oct. 30, evening.  
Shondlee, Thursday, Oct. 31, evening.  
Queenstown, Friday, Nov. 1, evening.  
Armada, Saturday, Nov. 2, afternoon.  
Badger Lake, Sat., Nov. 2nd, evening.  
Redlaw, Monday, Nov. 4, evening.  
Sundial, Tuesday, Nov. 5, evening.  
Prairieville, Wednesday, Nov. 6, aftn.  
Vulcan, Wednesday, Oct. 6, evening.  
Red Cross, Thurs. Nov. 7, evening.  
Berywater, Friday, Nov. 8, evening.

### TRY OUR CLASSIFIED ADS.

### CANADIAN SALMON RICH IN PROTEINS NEEDED IN DIET

Investigations made by scientists have established that Canadian salmon are higher in protein content than practically any of the meats considerably higher than cereals or vegetables. The importance of this fact, from the dietary standpoint, is that proteins are not only sources of energy but they are builders of tissue as well. The Pacific coast salmon that is richest in protein content is the Pink, and not, as may be popularly thought, the more famous Sockeye. Protein content is also higher in the Coho than in the Sockeye, whose favored place in public opinion is largely due to its more attractive color. The Atlantic salmon ranks next to the Pacific coast Pink in percentage of protein.

Know your druggist better. He's your doctor's right hand man.

If the pharmacist could depend for a living on the dispensing of prescriptions, the sale of sick-room supplies, medicine cabinet requisites, and other professional services, he would not need to devote so much space and time to the commercial side of his calling. In order to maintain an efficient prescription department, ready to serve you when sickness comes, your druggist must be a merchant as well as a professional man. Hence your druggist is more than a merchant. — TRY THE DRUG STORE FIRST.

## Markets For Western Products

The story of the marketing of the grain of the western provinces of Canada is a long, complicated, but exceedingly interesting one. It is a record of one acute problem arising in succession to another as the years passed and conditions both at home and abroad brought about radical but inevitable changes. It is a history filled with heroic efforts, the breaking new trails, the grappling with the seemingly impossible, in the endeavor to solve first one problem and then another, thus removing the difficulties that lay in the path to successful, prosperous, western agriculture.

Twenty-five or thirty years ago the chief cause of complaint was the then existing elevator combine, closely linked with the transportation companies. The passage of the original Canada Grain Act, with its provision of the landing platform, went a long way towards the removal of that grievance.

Then, with rapid increase in settlement and consequent production in the early years of the present century, lack of railway facilities resulting in annually recurring blockades, caused enormous loss to the producers. The great era of railway building largely solved that problem.

The elevator problem, involving questions of grading, dockage, charges for services rendered, depressing of prices, etc., still remained acute. The result was the inauguration of Government-owned and operated elevators in some provinces and farmers' co-operative elevators in Saskatchewan, the creation of the United Grain Growers, and constant revision and amendment of the Canada Grain Act.

Following the war, and the enormous increase in acreage brought under cultivation by the Greater Production campaigns, coupled with the complete demoralization of world trade, falling prices, and lack of credit and buying power in Europe, and, in particular, the abandonment of the wartime Wheat Board, western grain growers found themselves in a serious predicament, faced with prices barely equivalent to, even below, the cost of production. With courage and unsurpassed initiative western farmers grappled with the problem and worked out their own salvation through the organization of their great Wheat Pools.

Conditions improved, marketing became more scientific, prices somewhat more stabilized. Then came the crop of 1928, the largest in volume in the history of the west, but, owing to climatic conditions, one of poor quality. Within two years, too, the "combine" and the motor truck had come very largely into use, with the result that the grain poured into the elevators not only in unprecedented volume, but with unprecedented rapidity. The building of good market roads likewise served to speed up deliveries.

The net result was a situation which, while providing employment for a huge army of harvesters, and an enormous volume of traffic for the transportation companies, left little margin of profit for the grower of the grain. Complaint was almost universal against the Board of Grain Commissioners, it being very generally felt that it was "asleep at the switch," and had not made even reasonable efforts to cope with the situation which had developed. The old Board was replaced by a new one which has the confidence of the farmers and from which better things are expected.

Beneficial as the operations of the Pools have been, there has been developed in some quarters, and notably in Saskatchewan, a feeling that the maximum benefits to be derived from united selling cannot be realized until every bushel of wheat grown in Canada is marketed through one agency, namely, the Pools, and that, human nature being what it is, this cannot be secured through wholly voluntary efforts, and consequently the minority should be compelled by legislation to throw in their lot with the majority and make to deliver their wheat to the Pools.

While this agitation is being carried on, a new situation has developed. Owing to a large carry over from the 1928 crop, and the rapid harvesting and delivery to the elevators of this year's crop, and with a manifest reluctance on the part of European buyers to purchase Canadian wheat at a price commensurate with its value and production cost, there is practically no movement of grain out of Canada at the present time. The result is that all forms of storage in this country are, at the time of writing, almost filled up, and embargoes on shipments in effect.

The situation is believed to be only a temporary one, and that, as soon as other wheat exporting countries, now selling below the price which Canada demands, are out of the market, there will be a call for Canadian wheat and a price obtainable acceptable to the Canadian producer.

However, with the steadily increasing size of the Canadian wheat crop, and increases in other countries as well, western farmers must inevitably take a keener interest than ever before in the whole subject of finding and developing export markets for Canadian products. The possibilities of the awakening Orient call for close investigation and expert study. Such subjects as the effect of Canada's Government-owned merchant marine, operated at a loss, in opening and developing new markets require careful consideration as to whether the direct operating loss is not more than offset in national gains and profit through the development of export trade.

## Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## London Suffers From Drought

According To Records, Condition  
worst In Seventy-One Years

London is experiencing the worst drought on record in 71 years, a 32-day lack of substantial rainfall eclipsing the dry period of the summer. The Lea River, supplying a considerable area of eastern and northeastern London, is beginning to fall, causing acute anxiety.

Garden watering from hoses or outside taps was stopped by the authorities several months ago and the special assessment levied for this service will be reduced by half at the next date of payment, the water board promises.

## ST. VITUS DANCE

A Disease Of the Nerves Which  
Must Be Treated Through  
the Blood

St. Vitus Dance is a disease of the nerves brought on by a morbid condition of the blood. It is a common disease with children, but sometimes attacks adults. The treatment of this trouble to be successful is through the blood, because rich, red blood is the life food of the nerves. In this way Dr. Williams' Pink Pills have proved beneficial in even the most severe forms of this trouble, because they enrich the blood supply, thus carrying the necessary food to the nerves. In proof of the value of Dr. Williams' Pink Pills in cases of this kind we have the statement of Mrs. William Stead, Warton, Ont., who says: "My eldest girl at the age of nine years suffered from an attack of whooping cough which left her very weak, and finally developed into a severe attack of St. Vitus Dance. She was under a doctor's care, but with no beneficial results. We also tried other treatment, but with no better results. To make matters worse, she was taken down with measles. Again the doctor was called in, as she became so weak, and her limbs so trembly that we had to take her about in a little hand wagon. I thought a change of air and scene might help her, so we sent her by boat to Port McNicol, a distance of about a hundred miles. She seemed to improve while there, but as soon as she came home her strength was gone again. I took her to another doctor, but with no better results. I was distracted to see how helpless she was becoming, so decided to give Dr. Williams' Pink Pills a trial. I got six boxes, and they did what neither doctors nor other remedies had even started to do. They built her up completely; the St. Vitus Dance disappeared, she has no sign of weakness and can run and play with the other girls, a thing she could not even try to do for about eighteen months. She walks to and from school, a distance of about a mile, which, of course, is proof of her present good health. I have much to praise Dr. Williams' Pink Pills for, and always recommend them in all cases of weakness."

You can get these pills from any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Use Of Combines

More reaper-thresher combines have been in operation in the Brandon district this year than ever before, despite short grain crops.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

## Going To Brandon

Dr. Buckley Is New Agrostologist At  
Dominion Experimental Farm

Dr. G. F. H. Buckley has recently been appointed to the position of agrostologist at the Dominion Experimental Farm, Brandon. Dr. Buckley was born in Halifax, N.S. He received his Bachelor of Science degree from the University of Alberta in 1920. On his return to Edmonton he became assistant professor of field husbandry, having special charge of the field experimentation. At the Brandon farm Dr. Buckley will continue the corn breeding investigations which were commenced in 1925. This work is being carried on with a view to developing a cold-resistant, early maturing variety of corn that will give good yields for fodder and silage.

## A Wonderful Machine

Transforms Music Into Ribbon Of  
Light and Responds To Every  
Change

Music was transformed into a ribbon of light and made to write its soul characteristics on a cloth screen at Steinway Hall, New York.

When low, pure tones were sounded the strip rippled smoothly like wave motion travelling along a rope, but when harsh, discordant sounds were made, the shining line writhed and contorted like an agitated snake. For all graduating of harmony the line showed distinctive waves, different for each sound, even down to discrepancies in tone too fine for the ear.

The instrument is a development of the Osiso, which has been used for some time to photograph voice and music characteristics. The new device substitutes a moving picture for a "still." It is a mirror, vibrating under control of an electrical current from a microphone that picks up the sounds to be pictured. This mirror reflects a beam of light through revolving mirrors. It was developed by William Baird White, acoustic engineer of the American Steel & Wire Co., and C. Anderson, engineer of the Westinghouse Electric & Engineering Co.

Music students are given a pattern of a perfect sound and attempt to reproduce it in the light.

"It seems certain," said Mr. White, "that improvement can be attained in this way, but it also seems certain that no amount of effort will transform a good clerk into a great artist, for one of the things demonstrated is that each artist produces patterns as individual as his signature, and although others may be able to imitate these patterns fairly well, apparently no one else can reproduce them exactly."

The Osiso is designed to calibrate the harmony of musical instruments, and detect imperfections, whether in tones from wires or strings, or reverberations of sounding boards. Mr. White said that it is found sounding boards sometimes reverberate better at some points in the scale than others.

Some gourds weigh as much as 30 pounds.

## Delegation Sails For Japan

Party Has Gone To Tokio For  
Preliminary Conference

Just what will loom up as the chief subject for consideration at the forthcoming meeting of the Institute of Pacific Relations at Kyoto, Japan, cannot be known until preliminary discussions are held, said Lord Hailsham, on his arrival at Ottawa. Lord Hailsham heads the British delegation, several members of which spent a few days as guests of Their Excellencies the Governor-General and Lady Willingdon, before proceeding west to Vancouver. They sailed for Japan on October 3.

## Woman Aviator Killed

Miss Josephine Callahan, armless woman flyer, was killed when an unlicensed plane she was piloting crashed in a cotton field near Abilene, Texas. Miss Callahan, said to have been armless since birth, had a special arrangement on the control stick for handling the plane with artificial arms.

## The right way to redye Finest Silks

TEXTILE manufacturers always use special dyes for silk or wool. They know that is the only way to secure the most perfect results. The makers of Diamond Dyes are the first to enable home users to follow this plan.

Next time you want to dye some of your more valuable articles of pure silk or wool, try the special Diamond Dyes in the blue package. They will give these materials clearer, more brilliant colors, with greater depth and permanence than any "all purpose" dye.

These special Diamond Dyes are just as easy to use as ordinary dyes. Like the white package Diamond Dyes, they contain the highest quality anilines money can buy. That's what

makes them go on so smoothly and evenly, without spotting or streaking. That's the secret of their brilliance; their resistance to sunlight, wear, and washing.

The white package of Diamond Dyes is the highest quality dye prepared for general use. It will dye, or tint, silk, wool, cotton, linen, rayon (artificial silk), or any mixture of materials. The blue package is a special dye for silk or wool only—with it you can dye your valuable articles of pure silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk or wool. Your dealer has both packages.

**Diamond  
Dyes**  
**Sun Proof**  
EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality anilines money can buy. And it is the anilines that count. They are the life of dyes; the source of their rich colors; brilliance and permanence.

## C. N. R. BRANCH LINE WORK IS WELL ADVANCED

Winnipeg.—Considerable progress has been made by the Canadian National Railways with the construction of branch lines on the prairies during the summer, according to H. A. Dixon, chief engineer of the western lines of the company.

Of the 568 miles of the new line in Saskatchewan and Alberta for which authority to build was granted by parliament at its last session, work has been proceeding on 418 miles. In some cases, grading has been as much as 70 per cent. finished, and on the Aberdeen-Melfort line, 25 miles of steel have been laid in an easterly direction from the junction with the Cudworth subdivision at Wakaw. There will be a continuance of all work on these branch lines until weather conditions no longer permit.

Although the program was one of the heaviest ever undertaken by the company, only 150 miles have had no work done on them. However, plans are prepared to begin work on this mileage next year and the assurance is given by Mr. Dixon that the program will be fully completed within the three-year period defined by parliament.

In addition to this program, the company has also succeeded in putting steel into the Sherritt-Gordon mine over the branch line authorized last fall and in practically completing the first lift of ballast to Fort Churchill over the 90 miles of grade upon which a skeleton track was laid last winter. The engineers in charge expect to have this piece of track in such shape early next summer that through freight and passenger trains will be able to operate between The Pas and Churchill by the end of July at the latest.

### Predicts New Legislation

Resolution By Government To Prohibit Liquor Exports Is Expected

Ottawa, Ont.—The Ottawa Evening Journal says: "The announcement by Premier MacKenzie King that the government has not the power to prohibit the export of liquor to the United States is interpreted in well-informed political circles to indicate that at the next session the government will introduce legislation to ban the export of liquor across the border."

"This would be done by refusing clearance to shipments intended for American consumption."

"If the government sponsors a resolution to prohibit liquor exports, there is no doubt the measure will carry in the house."

### Indians Demand Rights

Northern Ontario Chiefs Base Claims On Treaty Of Utrecht

Sudbury.—Chiefs and delegates from all the principal Indian Reservations in Northern Ontario are meeting here at a general council to seek restoration of their ancient rights and privileges in the forests where their forefathers reigned supreme. The Indians argue their people are unfitted for modern civilized life yet, that their livelihood is bound up in streams and forests and that trapping is practically their only source of revenue. The treaty of Utrecht and a proclamation of George III. are the basis of their claims.

### Plan Junior Police Force

Will Be Similar To Royal Canadian Mounted Police

Ottawa.—Modelled on the Royal Canadian Mounted Police system, a junior police force is to be inaugurated in Ottawa. The force will have no practical work to do at first, but it is hoped eventually it will be recognized by the police department. Formation of the junior corps will, it is expected, reduce juvenile delinquency. Officers of the juvenile court and a local service club leaders are in the movement.

W. N. U. 1806

## Church Union In Scotland

Large Crowds Were In Attendance At Ceremonies In Edinburgh

Edinburgh, Scotland.—October 2 was an epoch-making day in Scottish ecclesiastical history. The union of the United Free Church and the Church of Scotland took place in the great Hall of Assembly on Annandale Street.

It was a day of joyful thanksgiving. Church bells were pealed, the school children had a holiday, and the Assembly Halls were brilliantly silhouetted by flood lighting.

The Assembly Hall was transformed into a scene of great beauty and dignity for the celebration of the act of union. Formerly it was a motor car garage, but it held 15,000 persons who represented all aspects of Scottish life, and all the Christian churches of Europe and the Dominions.

Intensive emotion made dramatic the signing of the act of union by the moderators. By this act the churches became merged into the Church of Scotland. Rev. Dr. John White, of Glasgow, had the honor of becoming the first moderator of the new and greater body.

### Grain Ships Tied Up

Boats On Lower Lakes Have Had Slack Season

Montreal.—Eleven lower lakes bulk freighters of the Canada Steamships Lines have been placed in winter quarters at Kingston, on account of continued depression in the grain situation it is announced here. These vessels have been tied up during the larger part of the season and prospects for cargos during the next two months failed to justify their maintenance in commission.

In view of the fact that grain shipments have been small this season, and more particularly during the last three months, it is expected there will be a heavy movement next year as soon as navigation opens to Montreal. The grain in the country total stocks on September 20 being 149,674,643 bushels in Canadian elevators and 22,616,658 bushels of Canadian grain in U.S. elevators, and must be moved eventually.

### Saved Many Lives

Taxi Driver Used Ingenious Method To Rouse People In Burning Building

Brooklyn, N.Y.—A handful of toothpicks, carried by a cab driver probably saved the lives of more than 30 residents of a four-storey block here.

The block caught fire while all the occupants were asleep. The taxi driver, whose name was not learned, was in a restaurant across the street. Seeing the smoke pouring from the building, he rushed over and found the hallways filled with smoke.

Returning to the restaurant he grabbed a handful of toothpicks. Going back to the burning building, he went from door to door through the hallways, pressing the doorbell buttons in and inserting a toothpick to make them ring continuously. All of the occupants got out of the building, which was gutted by the flames.

### Three C.N.R. Ships Sold

Purchased By Navigation Co. For Vancouver-California Service

Vancouver.—Announcement is made that the Kingsley Navigation Company, Limited, has purchased the three steamers of the Canadian National Steamships service to California, and will merge it with the present sailings between Vancouver and California ports. The three ships are S.S. Canadian Rover, S.S. Canadian Observer, and S.S. Canadian Coaster. The vessels will remain under Canadian management.

The purchase price was not announced.

### No Cause For Alarm

Ottawa.—That Canada has no cause for alarm regarding changes likely to be made in the existing Fordney-McCumber tariff, was the statement of P. J. McCumber, former North Dakota senator and now member of the international joint commission which met here

## INVESTIGATE MOTION PICTURE INDUSTRY

Prof. Kenneth W. Taylor, of the economics department, McMaster University, who has been appointed by the Federal Minister of Labor to conduct, under the Combines Investigation Act, the preliminary investigation into the alleged combine in the motion picture industry in Canada. This preliminary inquiry is to decide as to whether or not a royal commission will be appointed to delve into the matter, and Prof. Taylor expects to submit his report to the government in a couple of weeks.

### Foreign Minister Is Dead

Dr. Gustave Stresemann Was Active In World Peace Movement

Berlin.—Foreign Minister Gustave Stresemann died suddenly October 3. Dr. Stresemann had been in ill-health for months, but recently he had so far recovered as to be able to participate in the arduous conference at The Hague on reparations and the session of the Assembly of the League of Nations at Geneva.

Dr. Stresemann was one of the foremost statesmen of post-war Europe, and with Aristide Briand, French premier and foreign minister, generally was considered one of the most active of the world's peace workers. He was president of the German People's Party, a member of the Reichstag, a former chancellor of the German Republic, and the most widely known member of the present cabinet, headed by Chancellor Mueller.

Death came as a result of a heart attack after a stroke of paralysis.

### To Test B.C. Coal

Victoria, B.C.—At a meeting of fuel experts here, presided over by Hon. W. A. MacKenzie, Minister of Mines, ways of developing and widening the market for British Columbia coals were discussed, with the result that it was decided to send a sample carload of forty tons from the various collieries in the province to the new laboratory at Ottawa for testing purposes.

## Would Prefer Being Ousted By Britain

But Nova Scotia Hopes To Sell Coal In Canada

Halifax.—If Nova Scotia is to be ousted from the home market in Canada it would be preferable to have it done by British coal rather than U.S. coal, though the result is largely the same for Nova Scotia mines, is a statement issued by Hon. G. S. Harrington, in which the Nova Scotia Minister of Mines declares there is no promise for improvement in the Nova Scotia coal trade in the proposal of Rt. Hon. J. H. Thomas to organize wheat shipments to England and return English coal in the ships.

Hon. Mr. Harrington coupled his statement with an appeal for a national policy which would secure the Canadian market as far as possible for the coal producers of Nova Scotia and Alberta.

### Dog Causes Boy's Arrest

Did Not Bark and Police Figured Burglar Was Known

Toronto, Ont.—A 15-year-old boy was arrested charged with the theft of jewelry valued at \$3,000 from the home of Samuel Langdon, here. The arrest was brought about by the silence of the Langdon's pet dog, which had kept silent while the boy stole the jewelry from a miniature safe.

When Mrs. Langdon told detectives that she thought it strange that the dog had not raised any commotion, that at once narrowed their search down to people whom the dog knew. They questioned the boy and he finally confessed, they claim.

### British Youth Seriously Hurt

Loses Leg When "Riding Rails" En Route To West

Port Arthur, Ont. Sixteen-year-old Sydney Chapman, new to this country from Whitley, Northumberland, England, joyously "riding the rails" headed for the "Golden West," lies in a serious condition in a local hospital, minus a leg and with his attendants "hoping he will recover." Young Chapman was found near a track in the Canadian Pacific Railway yards with his severed leg lying 50 yards further down the spur. It is presumed he had attempted to jump from the freight train on which he was riding and had fallen on the rails.

### Business Still Increasing

Regina. The local post office, which has been claimed as the office doing the greatest business in the Dominion per capita of population of the city, showed a general increase in business for September over the corresponding month in 1929.

## Much Impressed by West

Hector Charlesworth, editor-in-chief of the Toronto Saturday Night, and author of "Candid Chronicles" and "More Candid Chronicles," has been travelling over Canadian Pacific lines throughout the West on a combination holiday and business tour this summer. He is here seen in the grounds of the Empress Hotel, Victoria, which he visited for the first time since its construction. He was greatly impressed with the rapid growth and development of the entire city of Victoria.

## TRADE RELATIONS WITH RUSSIA WILL BENEFIT CANADA

Vancouver.—Resumption of relations with Russia is one of the most important things which can happen in development of Canada's trade in the opinion of Sir John Aldred, president of the Bank of Commerce, who was in Vancouver, en route to Japan, where he will represent Canadian bankers at the Institute of Pacific Relations Congress.

"It is unthinkable that present conditions can continue," said Sir John in the course of an interview. "By resuming relations with Russia I believe Britain and Canada will get a good part of the trade now being enjoyed by Germany and the United States."

While Russia is not listed among countries which will be represented at the congress, Sir John is hopeful that it will take some part. He believes this to be of vital import as a factor in better relations in the Pacific. Transportation and radio, Sir John believes, will play an important part in deliberations of the congress. While countries are not bound by the decision of their delegates he believes the meeting will have a beneficial effect on business and relationships.

## Outlines Policy Of Labor Government

Secretary For Foreign Affairs Addresses Annual Conference At Brighton

Brighton, England.—Palestine will remain a national home for the Jews; British evacuation of the Rhineland will be complete by December 14; no pledges have been broken in securing agreement with Russia on exchange of ambassadors; and a new treaty with Egypt will be made when the people of Egypt signify they are in support of any Egyptian government.

These are cardinal points of an outline of the Labor Government's policy on the outstanding foreign and empire questions of the day, given by Rt. Hon. Arthur Henderson, secretary for foreign affairs, at the Labor party's annual conference here. Mr. Henderson's address also included a strong plea for support of Britain and the United States, and the statement that the negotiations had reached the stage where it was hoped that Japan, Italy and France would soon be able to join in.

The foreign secretary declared that when with the dominions, "with whom, of course, he acted in close consultation," the British government signed the optional clause and thereby expressed adherence to the court of international justice at The Hague, "it gave a fresh impetus to the cause of international arbitration."

But signature to the optional clause was not enough, though it provided for compulsory arbitration of international legal disputes. The British Government, said Mr. Henderson, was giving "most earnest consideration" to compulsory arbitration of other classes of disputes. When that problem was settled the government would have paved the way to more than all-round reductions in armaments than ever before was contemplated.

### Not Worried Over Deficit

Experts Say Situation In Britain Is Quite Satisfactory

London, England. A deficit of \$360,000,000 is revealed in the government revenue returns for the first six months of the financial year, it is announced. But the situation is regarded by experts as being not unsatisfactory, inasmuch as the deficit is \$20,000,000 lower than for the corresponding period last year. Rt. Hon. Winston Churchill, as chancellor of the exchequer until a few months ago anticipated a reduction of \$60,000,000 in the revenue over the whole year.

St. Gotthard's tunnel in Switzerland is 6,600 feet below the peak of the mountain Katchhorn.

Reading Notices, per count line ... 10c  
Legal Advertising, 15c per count line  
first insertion and 10c per count line  
each subsequent insertion.

Contract advertising rates on applica-  
tion.

Notices of entertainments, meetings,  
sales, etc., at which admission is  
charged, articles sold, or collection  
taken, with the exception of actual  
church services, will be charged for  
at the regular advertising rates.

All advertising changes of copy  
must be in the hands of the printers  
by noon on Tuesday or no changes  
can be made or ads. discontinued.

EDOUARD J. ROULEAU,  
Editor and Publisher

### A TONIC

A tonic means giving tone and vigor  
to the system; giving or increasing  
strength.

"When everything goes wrong and  
we are blue; when obstacles surround  
us and discouragement sets in, we  
yearn for sympathy—but that is not  
what we need. We need a tonic either  
actual or metaphysical—perhaps both."

Of the latter kind here is one that  
should make us snap out of our de-  
pression and get back upon our feet.  
We quote from "Electrical Merchandising":

"One of the big open tournaments  
was played upon a course which had  
fairways of velvet and roughs like the  
middle of a tamarac swamp. All of the  
contestants in the tournament were  
kicking excepting Hagen and Bobby  
Jones.

"What do you think of these Gehennic  
roughs, Bobby?" they asked Jones.  
"As fair for one as for the other,"  
responded Bobby.

"And what do you think, Walter—  
what's your opinion of these roughs?"  
"What roughs," responded Hagen.

The next time you are blue, and  
you think you have all the troubles in  
the world, and you think you are not  
getting your fair share of business, re-  
member the other fellow has his trou-  
bles too.

The "fairways and roughs" of life  
are the same for one as another and  
whether you are a success or not de-  
pends how you tackle the job in hand.  
Just do the very best you can and  
you can't do any more.

### THE PAPER'S POSITION TO THE COMMUNITY

A writer to a newspaper colleague  
in a nearby town has a few pointed  
remarks in his letter relative to the  
value of the local newspaper to any  
community. The letter was prompted  
by an editorial appearing in the paper  
in which the editor set forth a few  
facts squarely to his local business-  
men.

Here are the words of that corres-  
pondent which are especially worth  
reading.

"I was personally very interested in  
your paper the other day to read  
how you put the facts squarely up to  
the businessmen of your town. If the  
paper should cease publication for a  
time there would be sure to be some-  
thing doing, for a small town these  
days is certainly lost without a home  
paper, and no matter how many out-  
side papers come into the community  
there is none with the home touch of  
the local printer, and it would sure be  
missed.

"In days past there have been those  
who looked upon the support given to  
a local paper as so much money spent  
for the general good, but that has  
been exploded, and it is now a case of  
the businessmen of the community  
getting results from their newspaper  
advertising that can be had in no other  
way, and it is very noticeable all  
over this country that the most pros-  
perous cities are those whose mer-  
chants use the local paper in season  
and out to keep their public informed  
of their doings.

"Then, again, a newspaper may be  
giving of its energies and money in  
an endeavor to publish a paper that  
appeals to the reading public, and  
there have been a few who could af-  
ford to do this as a hobby, but the  
average newspaperman of today can-  
not do this forever, and now it is a  
case of the better support given to  
this paper, the better paper can be  
produced, and it is a well known fact  
that there never was a business that  
gives more to the community than  
the local paper."—Exchange.

## Here and There

(394)

In commemoration of the ill-  
fated d'Anville expedition which  
encamped on the shores of Bedford  
Basin in 1746 and in which d'An-  
ville and many of his men died of  
illness, His Honor Lieutenant-Gov-  
ernor Tory of Nova Scotia unveiled  
a monument erected by the Historic  
Sites and Monuments Board of  
Canada at Rockingham, N.S., re-  
cently. Many distinguished guests  
attended the ceremony.

Total quantity of strawberries  
exported from Nova Scotia to the  
United States during the present  
season was 7,804 crates with 32  
boxes to the crate. The blueberry  
crop of the province has attained  
record proportions, 20,914 crates  
having been shipped to Boston so  
far this year, with another month  
to go, as compared with 17,442  
crates for the whole season of 1924.

Major prize winners at the High-  
land Gathering and Scottish Festi-  
val recently held at Banff are an-  
nounced as follows:—Pipe-Ser-  
geant Donald McLeod, of the  
Queen's Own Cameron Highland-  
ers of Winnipeg, is the winner of  
the special inter-regimental com-  
petition for delegate pipers from  
Canadian Highland units and holder  
of the E. W. Beatty Trophy; Pipe-  
Sergeant J. K. Cairns, of Hamilton,  
is the winner of the special trophy  
competition, open to all regimental  
pipers who are regular members of  
a pipe band officially connected  
with any regiment or unit of the  
Canadian militia; and Piper Hector  
McDonald, Royal Highlanders,  
Montreal, took the highest aggre-  
gate number of points over all in  
the open piping events.

According to figures obtained by  
the Canadian Pacific Steamships  
Limited, the port of Vancouver now  
ranks first of Pacific Coast ports,  
outstripping San Francisco and Los  
Angeles in volume of outward and  
inward shipping traffic and ton-  
nage of exports and imports.

"I am paying my first official  
visit to Canada as Chief of the Sal-  
vation Army and while here I hope  
to meet at the three annual gather-  
ings to be held in the Dominion  
every officer of the Salvation Army  
in Canada and Newfoundland,"  
said General E. J. Higgins, newly  
elected head of the Salvation Army,  
who arrived at Quebec recently on  
board S.S. Empress of Australia.

More than 365 miles of new rail  
lines in western Canada will have  
been completed and turned over to  
the operating department of the  
Canadian Pacific Railway in the  
period between June 15 and Sep-  
tember 16 of this year, is the state-  
ment made recently by D. C. Cole-  
man, vice-president of western lines  
of the system. This mileage does  
not include, Mr. Coleman added, a  
further 370 miles of lines under  
construction as at September 6.

Inauguration of 1,250 miles of air  
mail services on the Prairies is  
expected about October 1, linking  
Winnipeg with Canmore, Alta., and  
thereby saving a day's time be-  
tween the points.

## CONFESSES TO MURDER BUT IS FREED BY JURY

Albert Lord, 29 year old chaff cutter,  
was discharged from the Bow Street  
Police court in London after he con-  
fessed to murder.

The case was described by the pre-  
siding magistrate, Sir Charles Brion  
as without parallel in the record of

English law.

Lord walked into a London police  
station recently, and told a frank  
story of murdering an unknown wo-  
man by throwing her over the para-  
pet of Waterloo bridge into the Tha-  
mes. He was bound over, and formally  
charged with murder on his own con-  
fession, after alienists had examined  
him and found him perfectly sane.

"In this case there is no evidence  
to connect Lord with any crime ex-  
cept his own statement," the public  
prosecutor admitted.

The magistrate, Sir Charles, said:  
"I cannot remember any cases, and I  
cannot find any reported in which the  
sole evidence of murder has been the  
prisoner's own statement." The prison-  
er was then discharged.

## The Renaissance of the English Folk Dance

"Merrie England" and the spa-  
cious days of Queen Elizabeth with  
Maypole and Morris Dance are  
being given new life in the Old  
Country within the present century  
and so great is the popularity of  
the revival that Hyde Park, the  
great London rendezvous of rank  
and society, has been gay with  
annual festivals of folkdancers in  
colourful motion. A century of  
industrialism has not been suf-  
ficient to kill the ancient urge and  
 Cecil Sharp, thirty years ago, was

astonished to see countrymen in  
an English village, fantastically  
apparelled, come dancing through  
the snow one Boxing Day to the  
strains of a concertina. Eleven  
years later he founded the English  
Folk Dance Society which today  
has a membership of 15,000 with  
over fifty branches. Certificated  
teachers from this society have  
been doing excellent work in  
Canada and will be encouraged  
greatly by the visit to this country

of sixteen of the best English  
dancers from the parent society  
under the leadership of Douglas  
Kennedy for a series of demon-  
strations at the forthcoming Eng-  
lish Music Festival at the Royal  
York Hotel, Toronto, November  
13-18 next. Lay-out shows groups  
of folkdancers; an English Folk-  
dance; and Douglas Kennedy,  
leader of the English Folkdance  
Society accompanied by Joan  
Sharp, daughter of the founder,  
with pipe and tabor.

## Snicklefritz -----

Salesman: "I asked the girl's father for her hand last night."

P.W.: "Did you give him a good argument?"

Salesman: "Did I? Say, before I got through he offered me not only her, but her two sisters and a cousin who stays there!"

Undertaker: "Come, come, where is the sixth palibearer?"

The Minister: "Pardon, sir, he's proposing to the widow."

Gertie: "I don't pet anything but animals."

Jack: "Well, I'm willing to be the goat."

The Woman: In the battle of tongues a woman can hold her own.

The Man: Then why doesn't she?

The Bride: "You n-never seem to t-take any interest in anything I do."

The Bridegroom: "Don't be unreasonable, my dear. I couldn't sleep last night for wondering what you put in that last cake you made."

Minister (treating small boy to a soda): "Now my little man, what do you say?"

Small Boy: "Oh, Boy."

Minister: "Is that the proper way to thank a person for a gift?"

Small Boy: "That's what dad says when his pals buy him a drink."

Dentist (to his vicar in chair): "After your powerful sermon last Sunday on 'The Beauty of the Truth' I cannot tell a lie. Er—this will hurt."

Before I married Maggie dear  
I was her pumpkin pie,  
Her precious peach, her honey lamb,  
The apple of her eye,  
But after years of married life  
This thought I pause to utter,  
Those fancy names are gone, and now  
I'm just her bread and butter.

## HEFTY HAILSTONES

How big do hailstones grow? In 1847 hailstones that measured 14 inches in circumference are said to have fallen in New South Wales. Others weighing four and one half pounds were reported after a storm at Cazorla, Spain, in June 1829. Thousands of balls of ice each as large or larger than an orange fell in Dallas, Texas, causing nearly five thousand dollars worth of damage. The most amazing report of such bombardment from the skies comes from Cotte, France. In October 1844, such large hailstones are said to have fallen that they wrecked dwellings and sank vessels anchored off shore. The formation of large hailstones begins at heights estimated at between 15,000 and 40,000 feet above the ground.

SLEEPS FOR SEVEN YEARS,  
THEN ASKS FOR PICKLES

A little girl woke up in a Moscow

hospital the other day from a sleep of over seven years.

She rolled over on her side, half-opened her eyes and whispered falteringly:

"Please bring me potatoes and some pickles. I am hungry."

The nurse, frightened as if a ghost had spoken, rushed to call the chief physician. In a few moments a corps of specialists gathered around to watch developments in the most amazing case of what may or may not be sleeping sickness the world has ever known.

In January, 1922, the girl was recovering from a severe attack of typhoid fever in her native village when she lay down to the longest sleep on record. Liquid food placed in her mouth was swallowed.

The Strathmore Hardware was robbed last week, this being the fourth time in the past few months.

## History In Narrative

"Pages From Canada's Story" Of Particular Interest To Pupils In Western Schools

"Pages from Canada's Story," by Helen Palk, is bound to be a considerable aid to students of history, particularly to those in our public schools round the age of eleven. Homeopaths claim that their formula and method of taking medicine is more advantageous to patients than the prescriptions of allopathists, and Miss Palk can certainly claim that placing before pupils of schools, in Canada, outstanding events in the history of Canada in narrative form will create a more lasting impression upon their minds. A great Frenchman, Rousseau, stated that "the book which, to my thinking is the happiest treatise on natural education is 'Robinson Crusoe,'" and it is apparent that the author of this little book realized that children will absorb those incidents connected with the vital events of our country's history, simple portrayals of character, and graphic descriptions of locations, more easily than a precise chronology of events, wearisome through sameness, tedious in its attempts at analysis and redundancy of phraseology.

In these word pictures, the authoress has successfully endeavored to place the essential facts clearly before the eyes of the reader, which instantly photographs them upon the mind, thus aiding the memorizing of them.

Extreme care has been taken in choosing the most vital and colorful events which appeal to the imagination of the child, and this without diverging from the truth, but as it has been written particularly in the interest of pupils in Western schools the story of Western development receives more descriptiveness.

The authoress has studiously avoided redundancy of phrasing, the use of hard words, and verbosity, all of which will be to the benefit of the children for whom it is written. It is not written for the historian or erudite person as is readily seen from the sketchy character of constitutional changes.

Its main educative feature lays in the vivid descriptions of early pioneer life. The dangers, struggles and tragedies of the pioneers who laid the foundation of this great nation, which cannot be too emphasized, as we are all prone to ignore the sacrifices and terrible experience of those who "built better than they wot of." To forget that but for their supreme daring, patient endurance and superb courage the conditions which prevail today, to say nothing of the retention of the country, would not have been attained.

Miss Palk has produced something better than a text book, she has produced a record of outstanding annals which will inevitably appeal to the scholars in our schools and prove both an incentive and fundamental ground for a more exhaustive study of Canadian history, and after all the greatest principle in education is to credit a desire for knowledge, to rear the tender thought and pour fresh instruction over the mind.

The avoidance of dates and tedious details is more of an advantage than otherwise. By taking periods instead of years, the authoress has been able to fix the main features of transpiring events and the chief characteristics of the participants in them more surely in the minds of children. By so doing she has reached the happy height of appealing to the sympathy and understanding of her readers, which of necessity must fill them with pride of ancestral triumphs and achievement, and incidentally a glow of patriotism. Who shall say that some of the children for whom the book is written may not be stung with some thought whose splendour may impel them to prove as great, if not more heroic, than those characters whom the authoress has depicted with a sure pen and clarity of insight.

Great thought and intense feeling come like instincts unawares to those who rise above mediocrity. Yes, certainly Miss Palk has given to the schools something more than a few pages from Canadian history, something more than a text book, a compilation of the most inspiring incidents in Canada's annals, vivid character sketches which impinge themselves upon the youthful mind, and best of all a well spring from which her readers can draw inspiration.

The book is splendidly illustrated, and as pictures not only have a great appeal to the young, but are longest remembered, they will materially help forward the objective of the authoress.

## SUNDAY SCHOOL LESSON

OCTOBER 13

## KEEPING FIT FOR THE SAKE OF OTHERS

Golden Text: "Know ye not that your body is a temple of the Holy Spirit which is in you, which ye have from God? and ye are not your own, for ye were bought with a price; glorify God therefore, in your body." —1 Corinthians 6.19, 20.

Lesson: Daniel 1.8-20; Corinthians 9.19-27; 1 Timothy 4.7-12; 2 Timothy 2.1-5.

Devotional Reading: Psalm 66.1-4, 16-20.

## Explanations and Comments

The young men who gave up wine and dainties for water and plain fare were strong both physically and intellectually. Their fine appearance was noteworthy; and, best of all, not only were they fairer and healthier for their abstinence, but their brains were clearer and they had more knowledge and skill in all learning and wisdom.

The result of the experiment was no surprise to them. A newspaper contains an account of an experiment made in the village of Hickington, England, which was a surprise to the drinkers themselves. Some of the villagers were so goaded by the taunts of the keepers of the beer-houses because of their Liberal political opinions that they formed a league among themselves to boycott the beer-houses for twelve months. At the end of a week the keepers of seven out of the eight beer-houses found that they would have to give up their business, and the advantages to pocket and health of the abstainers were evidently so great that many others of their fellow-villagers joined them. Almost the whole village are now members of the Workmen's Temperance League, as it is now called, for its political character has been lost sight of in its temperance interest.

All the world knows that food and drink wonderfully affect body and mind, that intoxicating drinks and sumptuous diet are harmful to both. Insurance companies have proved this; their tables show that intemperate habits shorten life. Physicians not only see the direct ravages made on the body by excessive eating and drinking, but they know it is more difficult to cure a moderate drinker of disease not traceable to drink than it is a total abstainer. Dr. Woods Hutchinson, in "A Physician's Straight Talk on Alcohol" says: "An amount of alcohol which one man might seem to consume with impunity may be seriously injurious to another; and a daily consumption which will produce not the slightest symptom of intoxication, or even of discomfort, or headache, may be slowly and fatally damaging the cells of your liver or kidneys. The conviction is growing among pathologists that the tissues of many moderate drinkers are damaged in this slow, insidious way, without their being in the slightest degree conscious of any injury or even discomfort. You never can quite tell what alcohol has done to you until the post-mortem—and then the question won't interest you much."

## Minard's Liniment for Warts.

One kind of enemy is a friend who does not oppose you when you are wrong.

## Breaks Up Gas In the Stomach

Don't suffer from dangerous gas pressing around your heart, from sourness, acidity, bloating or pain of indigestion. Stop worrying. Whenever you need quick stomach relief take a little Blaustrated Magnesia—powder or tablets. It breaks up gas, neutralizes acids and keeps the stomach sweet and strong, and digestion perfect. At all good drug stores.

## Permanent Civil Servants

1,900 Employees Of Federal Government Attain New Status

With the passing of an order-in-council, which has an important bearing on the pensions branch of the Department of Pensions and National Health, 1,900 employees in this branch become permanent civil servants. It dates from June 1. The pensions branch of the department has now been made permanent, and the civil service commission has classified the employees engaged in this work.

About 450 government employees in Ottawa are directly affected by the change; about 450 in Toronto, 250 in London, Ont.; 155 in Vancouver, 84 in Winnipeg, 72 in Calgary, and smaller numbers in other Canadian cities where the department operates hospitals for disabled veterans.

Good-bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape as from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

A power site of more than 20,000 horsepower has been discovered in the Tongass National Forest in southeastern Alaska.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

Eighteen years were required to make huge gates of Henry VIII's Chapel in Westminster Abbey.

## From Youth to Age

There are three trying periods in a woman's life: when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

## Gave Police the "Jumps"

What was thought to be a "time bomb," opened in haste by post-office employees at Ranger, Texas, was found to be a quantity of Mexican jumping beans bumping against the tin lid of their container.

## When Babies CRY

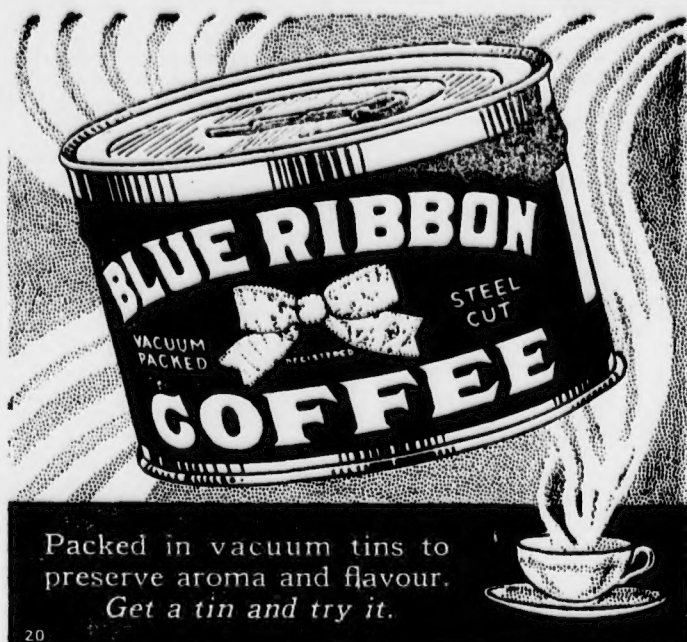

Babies will cry, often for no apparent reason. You may not know what's wrong, but you can always give Castoria. This soon has your little one comforted; if not, you should call a doctor. Don't experiment with medicines intended for the stronger systems of adults! Most of those little upsets are soon soothed away by a little of this pleasant-tasting, gentle-acting children's remedy that children like.

It may be the stomach, or may be the little bowels. Or in the case of older children, a sluggish, constipated condition. Castoria is still

the thing to give. It is almost certain to clear up any minor ailment, and could by no possibility do the youngest child the slightest harm. So it's the first thing to think of when a child has a coated tongue; won't play, can't sleep, is fretful or out of sorts. Get the genuine; it always has Chas. H. Fletcher's signature on the package.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. He marries Molly Winton, a ballad singer, and makes her famous too. Molly and Al have a baby, Junior, whom Al adores. Molly becomes interested in John Perry, Al's close friend, and Perry begs her to leave Al. One night, after Al has taken Molly home from the Club Bombo, where he is part owner, she turns on him in rage, saying she doesn't love him. Al believes it is a mood, but when Molly fails to appear at the Club Bombo New Year's Eve celebration he calls her. A feminine voice answers, but he cannot hear the words, as the 'phone door flies open.

### CHAPTER XVI.

Once more Al seized the door of the 'phone booth and slammed it hard—to stay shut this time. Then he turned back to the 'phone. He suddenly decided that he must make things up with Molly now—he would cast all pride aside and frankly beg her to do it.

"Sweetheart," he pleaded, "let's start the new year right. If there's anything I've done, I'm sorry. Let's make up."

There was a long silence, then the faint murmur of a feminine voice, whose words he didn't understand. A start of fear shot through him, but he persisted.

"I love you, Molly; you know how I love you. I can't bear to have you cold toward me!"

Now the voice at the other end was stronger; he suddenly realized

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, there is always quick relief in Aspirin. It will make short work of that headache or any little pain. Just as effective in the more serious suffering from neuralgia, neuritis, rheumatism or lumbago. No ache or pain is ever too deep-seated for Aspirin tablets to relieve, and they don't affect the heart. All druggists, with proven directions for various uses which many people have found invaluable in the relief of pains and aches of many kinds.

**ASPIRIN**  
Aspirin is a Trademark Registered in Canada

W. N. U. 1806

it was not Molly's voice at all, but the maid's. He heard her quick, distraught words come travelling over the wire like bullets.

"Mrs. Stone is not here. She has gone away."

"Gone away!" Al exclaimed. What do you mean?"

"Yes, sir; Mrs. Stone has packed up her things and gone. She left a letter for you."

Packed her things! Left a letter! Al felt the receiver slipping from his numbed fingers. Why, it couldn't be true; it mustn't be true! Through the glass window of the 'phone booth door he saw the gay dancers; the muffled sounds of their rejoicing reached him in a tantalizing murmur. He felt as if he were far away from them, completely isolated by his dreadful predicament. Molly had elected to leave him on this night of nights!

He fumbled for the dangling receiver and called again.

"Hello! Hello!" he shouted frantically.

"Yes, sir." The maid was still there.

"Please, Celeste, take good care of my boy until I come home. I'll be there in five minutes."

Again that uncanny pause, and then:

"I'm sorry; Mrs. Stone took Junior with her, sir."

Al nerved himself for a last effort. "I'll be right home. Then he dropped the receiver limply and tried to open the 'phone booth door. But the dancing crowd had overflowed the floor and was jammed in the narrow floor space against the door. Their bodies held it tightly closed, as they swayed back and forth, singing, crooning, dancing, but hardly moving in their tracks. Al gazed at them helplessly; it was as if these carefree revellers were deliberately trying to frustrate him tonight.

Then he sent the door open with a mighty shove, just as the lights, which had been dimmed, went on, and the music stopped. The sirens outside were still proclaiming the arrival of the new year—the couples stumbled over one another and over Al in their hilarity. But he saw and heard nothing. He moved relentlessly but quietly through them, his eyes straight ahead, a look of stricken tragedy on his face.

They were too addle-headed to see that look. As soon as he was recognized they pushed about him, clamoring for a song. A hand was held up, tendering a glass of champagne, but Al gently pushed it aside. A girl suddenly threw her arms around his neck and kissed him. As soon as he escaped a man caught him by the arm, calling his attention to his dancing partner and begged Al to meet the "sweetest lil' girl in th' whole worl'." Al did not smile or pause; he simply moved through them with one consuming thought—to reach home and find out about his boy. Then, finally, some of the more sober revellers realized that this popular master of ceremonies, this man they thought they knew, was like a grim-faced stranger in their midst. And they drew back quietly and let him pass.

He reached the lobby and went out into the night bareheaded. The sidewalks were impassably jammed—horns were blown raucously in his ears, a girl threw confetti in his face, blinding him temporarily.

Somehow he reached the curb and looked wildly about for a taxi. There was none in sight, so he started to run, dodging through the overflow crowd and among the motor cars. Some persons, seeing this bareheaded man, with the hurt intent eyes, running as if for his life, stopped and stared wondering what had happened. He reached the apartment house, breathless and exhausted, dashed into the elevator, ran through the hallways, flung open the door of his home. Celeste, the maid, confronted him, an expression of intense pity in her eyes.

Al dashed by her, standing in the middle of the drawing room, looking about wildly. The room appeared just the same, but there was a strange silence in the apartment. He was about to rush toward Molly's room or the nursery when he saw Celeste before him again, holding out a letter. He seized it and the maid discreetly retired.

Al had a terrible dread of opening it, but he nerved himself to the task and ripped back the envelope flap. Then he read the fateful message in Molly's distinctively vertical handwriting:

"Al  
"I'm leaving—don't try to persuade me to come back. I don't love you—I never did love you. It was hard enough to bear before John Perry came into my life. Since then it has been impossible."

Al looked up from the letter with a cry of rage and pain. For the first time he saw the whole situation in one blinding flash. Molly not only failed to love him, but she loved someone else. And that someone was John Perry—suave, immaculately dressed John—who, Al had believed, was his best friend. He realized now that Perry, whom he had trusted implicitly, had betrayed that trust from the first. Then another phase in the letter seemed to throb inside his brain—Molly said she had never loved him. She had lived a lie from the moment she said she would marry him!

For a moment this sense of bitter rage and contempt dominated all other thoughts and emotions in him. The sense of being cheated, not only once, but consistently for days, weeks, months, years, made him long to turn on both Molly and John Perry and blast them with scorn.

He recalled the countless times he had overlooked Molly's petulant moods, selfish caprices and savage outbursts of anger, always believing that she was loyal and fine underneath.

Now, suddenly, his thoughts turned to Junior, and he read on:

"I was going to leave the baby, but he woke up as I was leaving. He held out his arms to me and, after all, he is more mine than yours."

"MOLLY."

Al ran to the nursery. The dresser drawers had been pulled out and there were evidences of hasty packing all about. Some of Junior's toys lay scattered about the floor, among them his favorite, a woolly dog. His pillow had been thrown in the corner.

Al stood, dazed, gripping the foot-piece of Junior's bed. Where had Molly taken his boy?

For a moment Al was possessed by the determination to find Molly and Junior tonight—then he realized that the plan was futile. In this city of seven million persons and countless skyscraper hotels Molly and John Perry could have taken Junior, hiding away without difficulty.

After that note Al did not doubt that Perry was with Molly. Perhaps even now they were speeding toward Boston in Molly's Rolls-Royce, or they might have caught the night limited for Florida several hours ago. He went quickly to the 'phone and called up the garage.

(To Be Continued.)

The Oil For the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

In Bolivia all the useful minerals belong originally to the state.

For Sprains—Use Minard's Liniment.

### Says Farewell To Regiment

The evacuation by the second battalion of the Leicestershire regiment, the first complete British unit to leave the Rhineland, brought stirring farewell scenes. Practically the entire population turned out in the drenching downpour of rain to wish the soldiers godspeed.

### GOOD IN EVERY WAY

Baby's Own Tablets Banish Babyhood and Childhood Ailments

A medicine that all mothers praise—one good in every way—one that will quickly banish the minor ills of babyhood and childhood is the medicine to keep in the medicine chest; to always have on hand in case of emergency. Such a medicine is Baby's Own Tablets—they are helpful at all times. They are a mild but thorough laxative which by regulating the bowels and stomach banish colds and simple fevers; correct constipation and indigestion; relieve colic and diarrhoea and make the cutting of teeth easy.

Thousands of mothers use no other medicine for their little ones. Among them is Mrs. J. H. Bromley, Westmeath, Ont., who writes:—"I have four children and whenever any of them are ill I always use Baby's Own Tablets and have found them good in every way. I would not be without the Tablets and would also like your little booklet 'Care of the Baby in Health and Sickness.'"

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

All things come to those who wait—except the man who owes you money.

### Courtesy Of the Road

Majority Of Drivers Have To Suffer For Carelessness Of Selfish Ones

The majority of drivers are without doubt, safe and considerate; but unfortunately all road users are at the mercy of an ignorant and selfish minority, who seem to imagine that a display of recklessness will be mistaken for an exhibition of proficiency. The cult of the cheap car has not been attended by a corresponding cultivation of good manners. Until the quick-tempered, self-centred motorist learns that there is a code of courtesy which must be adhered to on the King's highway, the innocent will continue to suffer for the sins of the guilty.

The up-and-coming young man is pretty likely to succeed, unless he is up at four and just coming home.

Neon light signs are now popular in China to advertise restaurants, business houses, and newspapers.

### Good for Cattle

Keep Minard's in your barn for distemper and colic. An excellent first aid for your stock.

## Ideal--Wherever alterations are required

IN many a fine, old-fashioned farm house there are rooms much larger than people today consider necessary. This available space can be partitioned off into extra rooms with very little work and at surprisingly small cost by the use of Gyproc Fireproof Wallboard. And the Gyproc walls and ceilings of the new rooms will match the older walls—no matter how solid they are—for seasoned rigidity, good looks and permanence.

Gyproc is the perfect building material for all modern farm construction—for homes, barns, poultry houses, granaries and garages. It is pure rock—cannot warp, shrink or burn. With the use of joint filler and tape its sections meet in a tight, flush joint that insures a flat, smooth surface and takes any decoration.

Broad, ceiling-high sections of Gyproc can be nailed directly to joists and studs—easy construction with a minimum of labor.

Beautiful decorative effects can be obtained by applying Alabastine, paint, paper or panels right over Gyproc walls and ceilings.

CANADA GYPSUM AND ALABASTINE, LIMITED

Head Office: Paris, Canada

Branches: Montreal, Toronto, Windsor, Winnipeg, Vancouver

## WORLD'S FAMOUS THREE FUEL HART PARR

In special tests conducted by nationally known engineers who used cheap distillate fuel the great Hart Parr 18-36 registered a draw bar pull of 5,535 pounds at 2 miles per hour and 4,075 pounds at 3 miles per hour. On the belt it easily pulled the amazing load of 13 horse power. The Hart Parr is a three fuel tractor and will burn gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest low grade fuel. Hart Parris are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive yourself and experience the thrill of controlling tremendous power.

## NEWS OF ALBERTA

Since the recent discovery of crude oil in the Oyen district east of Hanna on the Goose Lake line, much local interest has been aroused with the result that in all probability a syndicate will be formed in Hanna for the purpose of prospecting that area.

The Olds Elks are giving the kiddies of that town their annual Halloween treat on October 31st.

The "Talkies" have been installed in the High River theatre.

Outwest Petroleum No. 1 well on the New Black Diamond structure, struck a heavy flow of gas upon entering the Home sands and drilling has been temporarily stopped owing to danger of fire.

"Const. Ploofe has been engaged by the town fathers to police the streets of our busy burg, especially at nights, watch drunks, and send the kids to bed or home at curfew at 8 p.m."—The St. Paul Journal.

The town fathers at Gleichen are still pondering over the rink question and the purchasing of a livery barn and erecting the rink on a community basis is receiving consideration.

Jack Miner, the world famous bird man and naturalist, will visit Drumheller next week.

## YOUR HEALTH

(By Edna Kells)

That an ounce of prevention is worth a pound of cure is the gospel which the Home Nursing instructor stresses in the short courses of lectures on home nursing and first aid arranged by the Department of Public Health. Miss Amy Conroy, R.N., who spends the greater part of the year travelling through Alberta on this mission is particularly well qualified for her task, being an "understanding person" as well as an expert nurse.

Throughout her lectures she stresses the importance of preventive measures, of quarantine in cases of contagious diseases, of cleanliness, of a pure water supply and plenty of fresh air, and of sanitary toilets. She also teaches the women to make use of simple home facilities insuring the sick.

Miss Conroy's itinerary is arranged early in the spring with a view of covering as much ground as possible. A local organization assumes the responsibility of making the necessary arrangements in the place she is to visit. She does the rest. In Magrath, where she was "seen in action," the Women's Bureau, the first organized under the legislation passed last winter, arranged the course. 2011 women and many girls attended Miss Conroy's lectures in 1928. This year they have turned out in larger numbers.

Forty women and girls attended the first of the four lectures in Magrath, and that in spite of the fact that harvest was its height. The first lecture had to do with the routine care of the sick, the second with contagious and infectious diseases, the third with first aid, and the fourth and last with maternity work.

Miss Conroy's work is not over when she concludes her lectures each day. At every point she is asked to visit the schools, look over the sanitary arrangements, and make suggestions as to how they may be improved. After the visit she makes an ideal layout and tells the women how they may bring this about. Sometimes the teacher has difficulties which call for outside advice. Certain pupils may be problems beyond her understanding. The nurse visits the home and tactfully endeavors to get at the root of the trouble and remedy it. New Canadians are visited, welcomed and given advice that will help them adopt themselves to Canadian conditions. Miss Conroy invariably finds these newcomers appreciative of the little attention.

Sometimes the nurse lends a hand to the local teacher who needs skilled attention for a sick patient unable to have a private nurse. Sometimes she is called upon to give first aid to the injured, or to advise people who are taking treatment from a doctor at a distance, and unable to see him frequently. To every call she responds.

And so Miss Conroy goes the rounds of the province, leaving knowledge and inspection in her wake, and a memory of skillful hands and a kindly heart. It is little wonder that the nurse-lecturer and her little gray runabout are welcomed wherever they go.

What Every Over-burdened Mother Needs.—A remarkable book just off the press, by Georgina Sackville. Contains special information for married people. \$2.30 each with order. "Home Publications," 320 P. Burns building, Calgary.

## PUBLIC NOTICE

TAKE NOTICE that the Council of the Village of Carbon intends to pass a Zoning By-law under the provisions of the "Town Planning Act," being chapter 49 of the Statutes of Alberta, 1929, making regulations for any of the purposes set out in Section 30 of the said Act which the Council may consider to be of Public Interest. The proposed by-law shall, among other regulations, impose certain building restrictions in that portion of the Village of Carbon lying north and west of the Kneehill creek and shall be subject to the approval of the Minister of Municipal Affairs.

On and after October 1st, 1929, any person interested may inspect the proposed by-law at the office of the Secretary-Treasurer between the hours of 2 and 6 o'clock p.m. on any day except Sunday. The Council shall at its regular monthly meeting to be held at the office of the Secretary-Treasurer on the 2nd day of December, 1929, hear and determine all objections (if any) to the proposed by-law and shall pass the by-law at the same meeting unless any objection is sustained.

Dated at Carbon this 25th day of September, 1929.

Who Does Your  
Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

OCTOBER 11th & 12th

FAY WRATH &amp; GARY COOPER

— IN —

The  
Legion  
of the  
Condem'd

This picture is the sequel to "Wings" and it is a daring epic of the flying corps in the Great War. No finer film has been produced for some time in the film world and it can be truthfully said that no one will be disappointed if they attend this show on Friday or Saturday.

DON'T MISS IT
